

A DECADE OF ENVIRONMENTAL SUSTAINABILITY

At Coca-Cola HBC Ireland and Northern Ireland, sustainability is at the heart of our business and we hold ourselves accountable to deliver against an ambitious set of targets, aimed at driving continuous improvements. We are committed to growing responsibly, with a firm commitment to conduct all our business activities with respect for the environment.

In 2010, we set targets to reduce our water, waste and energy use.
Here is an overview of our achievements:

Using energy as efficiently as possible

43 million megajoules of energy saved, which is the same amount of energy consumed by 2,860 average households per year.

60% less carbon emissions per litre of beverage produced which is the equivalent of removing **900** diesel fuelled cars from the road per year.

100% of our forklifts are biogas powered.

100% of our electricity is from a clean and renewable source.

85% of our energy sourced from a Combined Heat Power plant.

10% of our total fleet are an electric or hybrid vehicle.

Energy efficient lighting installed in our Knockmore Hill facility.

50% of our refrigeration in customer outlets is energy efficient.

Responsible water stewardship

20% improvement in our water ratio. In 2010, we used **1.86** to produce one litre of beverage, in 2020, we used **1.49** litres.

Improved water efficiency for the **13th** straight year,

115 million litres of water saved in the last decade - the equivalent of 46 Olympic-size swimming pools.

Continue to Recycle water in our manufacturing processes and **returning clean wastewater to the environment** at a level that supports aquatic life via the local water authority.

Waste and recycling

Proud to be a **zero waste to landfill** site – achieved 5 years ahead of schedule.

Supporting **recycling programmes** and Extended Producer Responsibility schemes across the island of Ireland.

We continue to focus on eliminating waste from the manufacturing process and have reduced our tonnage of waste generated by **39%**.

Reducing virgin plastic usage by integrating more than **46% recycled PET (rPET)** across our portfolio and making our packaging **10% lighter**.

External recognition

In 2021, the **Dow Jones Sustainability Indices** ranked Coca-Cola HBC Group the worlds #1 sustainable beverage company for the 5th time in 7 years.

In 2020, we achieved **platinum status in the Business in the Community Northern Ireland Environmental Benchmarking Awards** for the 5th consecutive year.

In 2020, we signed our second **Prosperity Agreement** with the Northern Ireland Environment Agency.

Gold certification - European Water Stewardship (EWS) gold certification.

We were awarded **Green Manufacturer of the Year in 2020**.
